

# Apple Roll and Pick

Instructions: Print on cardstock paper and laminate. Attach self-adhesive magnets to the back of red pom-poms (I have also included red markers that can be used if you do not have red pom-poms). Place the "apples" on the tree. Children roll the dice and remove the number of apples shown on the dice. Play continues until all of the apples have been picked from the tree. This can be played as either an individual or group game with each child having their own game board and taking turns rolling the dice.
