

# Butterfly Matching Strips

Instructions: Print on cardstock paper and cut out. You can write letters ... numbers ... sight words ... beginning math equations in the blank butterflies and on the loose circles. Laminate all pieces. Children put the matching circle on top of the butterflies in the strips. These can be used on a floor or tables. You can also put the butterfly strips on a magnetic board or metal cookie sheet and attach self-adhesive magnets to the back of the loose circles.
