

## Ten Little Dinosaurs

One little, two little three little dinosaurs,  
four little, five little, six little dinosaurs,  
seven little, eight little, nine little dinosaurs,  
10 little dinosaurs playing in the forest.

Print on cardstock .... cut out and laminate. Put trees up on feltboard. Put one dinosaur up for each little dinosaur. When finished putting dinosaurs on the felt board count them all again with the children. Call a child up to remove one dinosaur (or remove the dinosaur yourself) and ask "Now how many dinosaurs are in the forest?". Repeat until all of the dinosaurs have been removed from the feltboard.
