

Circle Time Egg Hunt

Instructions: Write the skills you are working on such as letters numbers... names ... sight words ... math equations etc on the blank rectangles. Cut out rectangles and fold. Place skill cards inside plastic eggs and put the eggs around the room. Children find the eggs and return to their circle time spots. Teacher calls on the children to open an egg and read what is inside the egg. Children then put the eggs into a basket or bowl that is in the center of the circle time area.
