Five Little Birds

by Shelley Lovett

Five little birds sitting in a tree ...
Can you count them with me? 1 ... 2 ... 3 ... 4 ... 5.
One flew away to look for food
and then there were four.

Four little birds sitting in a tree ...
Can you count them with me? 1 ... 2 ... 3 ... 4.
One flew away to help build a nest
and then there were three.

Three little birds sitting in a tree ...
Can you count them with me? 1 ... 2 ... 3.
One flew away to visit his friends
and then there were two.

Two little birds sitting in a tree ...
Can you count them with me? 1 ... 2.
One flew away to find water
and then there was one.

One little bird sitting in a tree ...
Can you count with me? 1.
He flew away to get warm in the sun
and then there was none.

No more little birds sitting in the tree.

Soon the little birds flew back to the tree ...
they were all as happy as can be.
Can you count them with me? 1 ... 2 ... 3 ... 4 ... 5.
Five little birds sitting in a tree.
