

Find The Hearts Game

****Note**** This game can be done with other patterns besides hearts.

Instructions: You will need to have a bag or a container for each child to place there hearts in when they find them. We used white paper bags and decorated them.

Print the heart patterns on cardstock paper (make as many hearts as you wish). Cut out and laminate the hearts. You can write letters ... numbers ... sight words ... math equations ... shapes etc on the back of each heart.

Hide the hearts around the room have the children find the hearts and place them in their bags. Before the children find the hearts I tell them to be quiet as mice and move very sneaky (this prevents a rush of children running and screaming to find the hearts). I also tell them how many hearts to find. You can help younger children find the hearts.

After everyone has found their hearts have them sit down in a circle. Call on individual children to reach take the hearts out of their bag and tell what is on the back of each heart. Continue until each child has had a turn.
