Leaf Size Sorting Bags

Instructions: Print one set of leaves on regular paper along with the size tags. Glue one leaf and size tag on one bag. You will need three bags so that you have a small ... medium ... and large bag with a leaf and tag on it. Print the leaves you will use for sorting on cardstock paper ... cut out and laminate. Print as many as you wish for this activity. Put the bags on the table or floor and the sorting leaves in a pile next to the bag. Have children sort the leaves into the correct size bag. I have also provided an extension activity where the children can count the number of leaves in each bag and write them on the sheet provided.

Leaf Size Sorting

How many small leaves did you sort? _____

How many medium leaves did you sort? _____

How many large leaves did you sort? _____
