Shape Skills Game

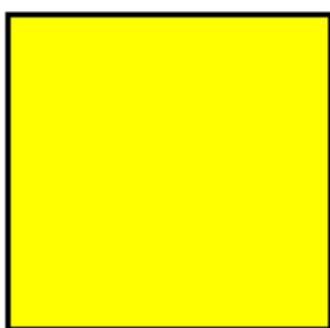

Instructions: Print on card stock paper. Cut game cards and tokens out and laminate along with game mat. Write the skills you would like to use such as letters ... number ... sight words ... simple addition equations on the back of the blank cards. Child places a token in the start position and then draws a card. If the child can read or identify what is on the back of the game card they move their game token one spot. If the child can not read or identify what is on the back of the card the card is placed back into the pile and a new card is drawn. Play continues until game token is moved to the finish position.
