

Puppy Roll and Cover Mats

Instructions: Print on cardstock paper and laminate. To use the blank mat the children roll the dice and count then cover the same number of circles on the mat. When the mat is covered they can then roll the dice and then count and remove the cover ups from the mat.

I have made two numbered mats ... one with numbers 1-6 and one with numbers 2-12. Children roll the dice and cover up the matching number on the mat. For the mat with numbers 2-12 children would roll two dice and add them together.

I have included both black and white as well as color mats. You can use playdough ... pom poms ... buttons etc for the cover-ups. For the black and white version you can use paint daubers ... markers ... or crayons to color the circles in.
