

Spring Puzzles

Instructions: Print on cardstock paper and cut along lines on puzzles (you should have eight pieces per puzzle). Laminate and attach velcro or self-adhesive magnets to the back of each piece. I have included greyscale puzzle guides as well as a blank puzzle guide. If you are using velcro attach a piece to each section of the puzzle guide. Make sure the velcro pieces on the puzzle and guide align. For use with magnets put the puzzle guide on a metal tray or cookie sheet.
